Average Satisfaction: 0.4390 AVG Arrival Delay in Minutes: 14.74 Loyal Customer Satisfaction: 0.4814

Customer Type

Business Insights & Conclusion

-Delays strongly reduce satisfaction: The analysis shows a clear negative correlation between arrival delays and customer satisfaction.

-Economy class is most sensitive: Economy passengers are less tolerant of delays compared to business class, making targeted compensation strategies more effective.

-Loyal customers remain more resilient: Loyalty program members show higher satisfaction even under delay conditions, highlighting the value of retention initiatives.

-Operational KPI target: Keeping average delays below 15 minutes is critical to sustaining overall satisfaction levels.

Conclusion:

Reducing delays and enhancing compensation for economy passengers, while strengthening loyalty programs, will maximize customer satisfaction and long-term revenue impact.

商業洞察與結論

1. **延誤與滿意度的關係**

數據顯示延誤時間越長，顧客滿意度顯著下降。經濟艙顧客對延誤敏感度較高，商務艙顧客相對容忍度較高。→建議：優先改善經濟艙延誤補償方案，提升大多數顧客體驗。

2. **忠誠顧客** vs **非忠誠顧客**

忠誠顧客滿意度平均高於非忠誠顧客。
延誤影響在忠誠顧客群體中相對較小。→建議：加強會員計畫與忠誠度獎勵，穩定高價值顧客群。

3. KPI **指標解讀**

平均滿意度：0.44
忠誠顧客滿意度：0.48
平均延誤時間：14.7 分鐘 → 建議：設定 KPI 目標為「平均延誤 ≤ 15 分鐘」，作為服務品質控制基準。

4. **綜合結論**

延誤控制是提升滿意度的核心。
忠誠顧客維護能帶來長期收益。
經濟艙補償策略是短期提升整體滿意度的最佳切入點。
